

Write code for following:	Hint 1
1.Unhide All Worksheets at One Go	VBA Coding/Macro Record
2.Hide All Worksheets Except the Active Sheet	VBA Coding/Macro Record
3.Sort Worksheets Alphabetically Using VBA	VBA Coding/Macro Record
4.Protect All Worksheets At One Go	VBA Coding/Macro Record
5.Unprotect All Worksheets At One Go	VBA Coding/Macro Record
6.Unhide All Rows and Columns	VBA Coding/Macro Record
7.Unmerge All Merged Cells	VBA Coding/Macro Record
8.Save Workbook With TimeStamp in Its Name	VBA Coding/Macro Record
9.Save Each Worksheet as a Separate PDF	VBA Coding/Macro Record
10.Convert All Formulas into Values	VBA Coding/Macro Record

Hint 2
VBA loop
VBA loop
This could be the case if you have sheet names as years or employee names or product names.
Specify the password within the code ("Test123")
Remove the password
Note that code works for worksheets only (and not chart sheets)
This code automatically identifies cells are used and convert it into values.
